## Description of Fellowship

The Nationwide Children's Hospital Pediatric IR training program offers exposure to a very broad range of pediatric interventions in a high volume setting. PIR attendings offer subspecialized expertise in complex vascular anomalies, complex venous and arterial interventions, GI/GU interventions, and musculoskeletal interventions. We benefit from outstanding referring services including active pediatric hematology/oncology, urology, surgery, and pulmonology. On completion of the training program, our fellows are able to operate independently at the highest levels of pediatric interventional radiology.
